

Our Commitment to Product Safety and Quality

At Blue Generation, we take great pride in our unwavering commitment to product safety and quality. As a trusted name in the market, ensuring the safety and compliance to industry regulations is at the forefront of what we do.

To maintain the highest standards of safety and quality, we adhere to the following practices:

Limited Number of Manufacturing Partners:

We procure our products from a select number of factories with which we have longstanding relationships, some spanning over 30 years. These trusted partnerships allow us to ensure consistent quality and safety across all of our products, as well as certifications by various global institutions such as Occupational Health and Safety Management Systems, Global Security Certification, International Environmental Management Systems, and are Wrap Certified Facilities.

Rigorous Manufacturer Selection Process:

The selection and vetting of our manufacturing partners is a meticulous process. Our longstanding relationships are built on shared values of quality, compliance, and safety. We continuously work with our manufacturers to ensure they meet and exceed our strict standards through frequent factory visits and testing.

Testing on Fabrics:

For the fabrics we use in production, our partner factories are required to submit annual safety and quality testing. This ensures that every batch of fabric meets our high standards and complies with relevant safety regulations.

Independent Testing by Trusted Facilities:

In addition to the annual testing conducted by our manufacturers, we utilize independent testing facilities such as Intertek to periodically verify the safety and quality of our fabrics. This third-party validation ensures transparency and reinforces our commitment to producing safe and reliable products.

Our comprehensive approach to product safety and quality underscores our dedication to delivering products our customers can trust. By combining long-term partnerships, rigorous testing protocols, and independent verification, we ensure that every item we offer meets the highest standards.

Sincerely,
David Zipes
President of Production
